SUMMARY

Fresher DevOps Engineer with hands-on experience in AWS, Linux, Git, Docker, Kubernetes, Terraform, Jenkins, GitLab CI/CD, and Cloud Automation.

Strong interest in Infrastructure as Code, Cloud Computing, and DevOps practices.

SKILLS

Linux | AWS | Docker | Kubernetes | Terraform | Git and GitHub
Jenkins | GitLab CI/CD | Python | Shell Scripting | Networking

PROJECTS

CloudSentinel

Cloud monitoring and automation. Signals, alert rules, and repeatable response steps.

S3 to Lambda to RDS Automation

An S3 upload triggers Lambda, which stores file metadata in RDS MySQL.

Static Website Hosting using S3 and CloudFront

Secure static hosting with global content delivery through CloudFront.

PRACTICE

DevOps Practice Labs - Jenkins, GitLab CI/CD, Docker, and Kubernetes.

AWS Hands-on Projects - S3, Lambda, RDS, CloudFront, and Terraform.

Linux Administration Practice - users, services, logs, networking, and shell.

LEARNING

AWS Cloud Learning - IAM, EC2, S3, VPC basics, Lambda, RDS, CloudFront.

DevOps Learning Journey - Linux, Git, containers, Terraform, and CI/CD.

Learning paths in progress. Not issued vendor certificates.
